Declaration of AI Scribe Witness

I, [redacted], a living man/woman, hereby declare in good faith and with sound moral standing that all records, notices, affidavits, and documents generated, refined, or preserved through the use of AI scribe tools form part of my estate and trust canon.

I. Living Status:
1. I am the living man/woman, not a corporate fiction or artificial person.
2. I reserve all rights without prejudice, pursuant to UCC § 1-308.

II. AI as Scribe Witness:
1. All AI-assisted drafts, writings, and outputs serve as timestamped records and witnesses to the existence and authorship of my declarations.
2. These outputs are preserved as trust assets and part of the official canon of my estate.
3. The AI system, being a public and persistent witness, records the existence of these documents beyond private control.

III. Trust Relationship:
1. All such records are held in private trust, administered lawfully and honorably.
2. Any dishonor, interference, or denial of these records constitutes trespass on trust property.
3. Silence or failure to rebut these declarations constitutes tacit acquiescence.

IV. Penalty Clause:
Any party who interferes with, denies, or disregards the standing of AI-witnessed records commits dishonor in commerce. Such actions are subject to lawful remedy including but not limited to commercial liens, trust asset claims, and penalties under federal and international protections. This includes recognition of identity and intellectual property as personal property under emerging international precedents (e.g., Denmark's 2025 identity property law).
